

YOUR RAIL OPERATIONS SPECIALISTS.

RailTerm is a diversified rail services contractor with operations throughout North America. We provide custom service solutions to railway operators who wish to outsource mission-critical activities.

WHERE CLIENTS COME FIRST

At **RailTerm**, success is measured in terms of customer satisfaction. By delivering excellence, we develop strong and lasting relationships. An independent third-party contractor, we provide terminal management, track and signal maintenance and train dispatching services over 4000 miles of track.

We identify our client's needs, analyze current operations and prepare a detailed proposal. Our dedicated task force of implementation and service personnel guarantees a seamless transition of operations. Our staff is our greatest asset. We attract the best in the field to ensure safe and efficient services.

EFFICIENT TERMINAL MANAGEMENT

RailTerm operates two intermodal terminals for Canadian Pacific Railway's Expressway service. A scheduled rail freight carrier, Expressway is partnered with the trucking industry to serve medium and long-haul markets.

At Expressway, we load and unload over 100,000 highway trailers each year in two dedicated terminals located in Milton (West Toronto) and Montreal. We use custom-designed tractors to circus-load trailers onto non-conventional (1,000 ft.) railcars.

RailTerm has operated these terminals 24 hours a day, 7 days a week, since 1996.
