

**YOUR RAIL
OPERATIONS
SPECIALISTS.**

TrainMaster is **RailTerm**'s state-of-the-art train dispatching software. This custom Windows™ application suite integrates all rail operations and accommodates each client's operating rules.

An independent rail services contractor, **RailTerm** has met the industry need for a comprehensive suite of applications to manage various operational configurations. A robust, state-of-the-art dispatching system, the **TrainMaster** product provides solutions specific to each client's requirements.

**WIDE RANGE OF
OPERATIONAL
CONFIGURATIONS**

KEY FEATURES INCLUDE:

- Easy-to-configure, control topology uses Client/Server design and TCP/IP application messaging, providing scalable solutions as operational requirements evolve.

WIDE RANGE OF OPERATIONAL CONFIGURATIONS (continued)

- Seamless CTC, dark territory and yard control integration within a multi-user environment.
- Simultaneous availability of multiple track topologies, subdivisions & railroads.
- Multiple Rule Sets (CROR, NORAC, GCOR, NS) supported simultaneously, and customized Form/Rule tailoring services.
- Real-time web-based graphic displays including Trackline, Trainsheet & Train Graph.
- Multiple integrated field communications protocols.
- Integrated DOB, GBO, TGBO with CTC and dark territory authority application.
- Operations reports and event log information available for management and maintenance personnel.
- Multiple language support: Bilingual interfaces available for all displays and Forms.

EMERGENCY BACKUP SERVICE

Our emergency backup services go beyond industry standards. An off-site data backup protects information from hardware malfunctions.

The dual-server architecture (redundant server) ensures that no data is lost. With multiple dispatch offices, **RailTerm** provides real-time emergency backup.
